Publishing, Subscription, and Advertising Offices: Pergamon Press Inc., Fairview Park, Elmsford, NY 10523, U.S.A., or Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England.

Published Twenty-four Per Annum (Four Volumes 1990)

annual subscription rates (1990)

Annual institutional subscription rate (1990) DM 3185.00.

Two-year institutional rate (1990/1991) DM 6051.50.

Personal subscription rate for those whose library subscribes at the regular rate (1990) DM 290.00.

Prices are subject to change without notice.

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press offices.

LIST OF CONTENTS

NUMBER 1

i Announcement

- | | | |
|--|-----------|--|
| J. L. T. Santos, M. M. Godse and K.-H. Chang | 1 | An interactive post-processor for structural design sensitivity analysis and optimization: sensitivity display and what-if study |
| W. J. Lewis and J. Shan | 15 | Numerical modelling of the non-linear static response of clad cable net structures |
| A. R. Kukreti and A. H. Shammaa | 23 | Fracture failure prediction using a moving finite element mesh refinement scheme |
| L.-W. Chen and L.-Y. Chen | 41 | Thermal deformation and stress analysis of composite laminated plates by finite element method |
| A. A. Abdallah and A. A. Huckelbridge | 51 | Boundary flexibility method of component mode synthesis using static Ritz vectors |
| S. H. Lo | 63 | Visualisation of 3D solid finite element mesh by the method of sectioning |
| J. S. Sandhu, K. A. Stevens and G. A. O. Davies | 69 | A 3-D, co-rotational, curved and twisted beam element |
| R. I. M. Al-Amery and T. M. Roberts | 81 | Nonlinear finite difference analysis of composite beams with partial interaction |

Announcements

- | | |
|-----------|--|
| 89 | First International Conference: Computer Aided Assessment and Control of Localized Damage, University of Southampton, U.K., 26-28 June 1990 |
| 90 | International Conference: Advances in Structural Testing, Analysis and Design (ICSTAD), Indian Institute of Science, Bangalore, India, 29 July-3 August 1990 |

NUMBER 2

i Announcement

- | | | |
|---------------------------|------------|---|
| S. I. Al-Noury | 91 | Concrete gravity platforms—computer aided analysis for safety factors |
| M. Zhou and R. Xia | 115 | An efficient method of truss design for optimum geometry |

| | | |
|--|------------|---|
| N. N. Wahba | 121 | Analysis of a plaster-wood wall using a series solution |
| N. N. Wahba | 141 | Dynamic response of a plaster-wood wall to sonic booms using a series solution |
| R. A. Raouf and A. H. Nayfeh | 163 | One-to-one autoparametric resonances in infinitely long cylindrical shells |
| G. Onu | 175 | Inclusion of warping shear effect in the thin-walled core element for multistory building |
| <i>Technical Notes</i> | | |
| A. Elsieid, J. Ragab and H. M. Esmail | 183 | Dynamic behavior of coupled shear wall through analytical models |
| E. C. Kalkan | 189 | Computations of an earth-dam reinforced-concrete bottom outlet |
| | I | Software Survey Section |

NUMBER 3

i Announcement

| | | |
|---|------------|---|
| M. M. Bernitsas and N. Vlahopoulos | 195 | Three-dimensional nonlinear statics of pipelaying using condensation in an incremental finite element algorithm |
| J. C. Luo and M. B. Friedman | 215 | Implicit decomposition as a tool for solving large-scale structural systems in a parallel environment |
| C. T. Tsai and A. N. Palazotto | 221 | A modified Riks approach to composite shell snapping using a high-order shear deformation theory |
| A. C. Singhal and M. S. Zuroff | 227 | Analysis of underground and underwater space frames with slip joints |
| N. Ganesan and K. R. Sivas | 239 | Vibration analysis of orthotropic shells with variable thickness |
| K. J. Berry | 249 | Parametric finite element contour mapping |
| C. Eller | 259 | Finite-element procedures for the stability analysis of nonlinear, parametric excited shell structures |
| N. Siva Prasad and Radha Sarma | 267 | A finite element analysis for the design of a conveyor pulley shell |
| <i>Technical Note</i> | | |
| A. Behraves and A. Kaveh | 279 | Iterative solution of large structures |

FRONTIERS IN COMPUTATIONAL MECHANICS

Symposium in Honor of Professor T. H. H. Pian

| | |
|---|-----|
| Announcement | v |
| S. N. Atluri and P. Tong: Dedication | vii |
| R. S. Barsoum: Asymptotic fields at interfaces using the finite element iterative method | 285 |
| T. Y. Chang, H. Q. Tan, D. Zheng and M. W. Yuan: Application of symbolic method to hybrid/mixed finite elements and computer implementation | 293 |
| E. H. Dill: A triangular finite element for thick and thin plates | 301 |
| J. Fish and T. Belytschko: A general finite element procedure for problems with high gradients | 309 |
| D. S. Kang: Present finite element technology from a hybrid formulation perspective | 321 |
| P. P. Friedmann: Numerical methods for the treatment of periodic systems with applications to structural dynamics and helicopter rotor dynamics | 329 |
| Y. H. Lin and F. Y. M. Wan: Bending and flexure of semi-infinite cantilevered orthotropic strips | 349 |
| S. T. Mau: Numerical simulation of the behavior of axially loaded reinforced concrete columns | 361 |
| A. K. Noor and J. M. Peters: Potential of mixed formulations for advanced analysis systems | 369 |
| J. T. Oden, J. M. Bass, C.-Y. Huang and C. W. Berry: Recent results on smart algorithms and adaptive methods for two- and three-dimensional problems in computational fluid mechanics | 381 |
| J. Orkisz, O. Orringer, M. Hołowinski, M. Pazdanowski and W. Cecot: Discrete analysis of actual residual stresses resulting from cyclic loadings | 397 |
| W. D. Pilkey and N. J. Fergusson: Some characteristics of frequency-dependent structural matrices | 413 |
| E. Reissner: On a one-dimensional theory of finite bending and stretching of elastic plates | 417 |
| R. L. Spilker and J.-K. Suh: Formulation and evaluation of a finite element model for the biphasic model of hydrated soft tissues | 425 |
| B. A. Szabó: Superconvergent procedures for the computation of engineering data from finite element solutions | 441 |
| T. E. Tezduyar, J. Liou and D. K. Ganjoo: Incompressible flow computations based on the vorticity-stream function and velocity-pressure formulations | 445 |
| Y. Yamamoto and N. Toya: Error considerations of the finite element method | 473 |
| H. T. Y. Yang, S. Saigal and D. G. Liaw: Advances of thin shell finite elements and some applications—version I | 481 |
| O. C. Zienkiewicz, R. L. Taylor, P. Papadopoulos and E. Oñate: Plate bending elements with discrete constraints: new triangular elements | 505 |
| Software Survey Section | I |

NUMBER 5

i Announcement

- | | | |
|--|------------|--|
| J. G. Malone | 523 | Parallel nonlinear dynamic finite element analysis of three-dimensional shell structures |
| W.-H. Chen and J.-T. Yeh | 541 | Three-dimensional finite element analysis of static and dynamic contact problems with friction |
| T. K. Paul and Koganti M. Rao | 553 | Stress analysis around an elliptical hole in thick FRP laminates under transverse loading |
| Y. W. Kwon and K. Y. Byun | 563 | Development of a new finite element formulation for the elasto-plastic analysis of fiber-reinforced composites |
| H.-S. Jing and M.-L. Liao | 571 | An improved finite element scheme for elastic contact problems with friction |
| M. Ghassemieh and A. R. Kukreti | 579 | An algorithm for the analysis of problems with combined material and geometric nonlinearities |
| C.-H. Sheu, G. De Roeck, M. Van Laethem and P. Geyskens | 593 | Application of the substructuring technique to non-linear dynamic structural analysis |
| M. S. Cheung and W. Li | 603 | Finite strip method for materially nonlinear analysis of reinforced concrete slabs |
| G. E. Blandford | 609 | Thin-walled space frame analysis with geometric and flexible connection nonlinearities |
| <i>Technical Note</i> | | |
| A. E. Anuta, Jr | 619 | The dimensionality of the modal equations |

NUMBER 6

i Announcement

- | | | |
|------------------------------------|------------|--|
| D. W. White and J. F. Abel | 621 | Accurate and efficient nonlinear formulation of a nine-node shell element with spurious mode control |
| S. W. Fowser and T. W. Chou | 643 | Numerical integration of Green's functions for an edge-loaded infinite strip |
| M. Kleiber and M. Saran | 649 | Finite element analysis of dynamic quasi-bifurcations in elastic-plastic structures |

| | | |
|---|------------|--|
| L.-W. Chen and J.-L. Chen | 653 | Non-conservative stability of a cracked thick rotating blade |
| J. Pietrzak | 661 | On the comparative evaluation of optimum equal-volume designs |
| H. S. Tzou and G. C. Wan | 669 | Distributed structural dynamics control of flexible manipulators—I. Structural dynamics and distributed viscoelastic actuator |
| H. S. Tzou, C. I. Tseng and G. C. Wan | 679 | Distributed structural dynamics control of flexible manipulators—II. Distributed sensor and active electromechanical actuator |
| L. M. C. Simões | 689 | Reliability assessment of plastic slabs |
| C. M. L. Wu | 705 | Nonlinear thermal and mechanical analysis of edge effects in angle-ply laminates |
| P. Smolinski | 719 | Convergence of multi-time step integration methods |
| | | <i>Technical Notes</i> |
| Y. Arun Roy, B. P. Shastri and G. Venkateswara Rao | 725 | Stability of partially supported square plates using high precision triangular finite elements |
| N. I. Ioakimidis | 729 | A hybrid method for the solution of crack problems based on the Cauchy integral formula and the Riemann-Hilbert problem |
| | | <i>Announcement</i> |
| | 733 | Twenty-second Midwestern Mechanics Conference, University of Missouri-Rolla, Rolla, Missouri, U.S.A., 7-9 October 1991 |
